

From mountain to sea

Wood Whittling

Collect sticks. That are around 15-20cm in length and the thickness of your thumb. Try to find soft wood like willow and avoid sticks that have knots. Hold the top end of the stick and keep it away from your body. Point the stick downwards. Carefully push the potato peeler down the stick, away from you., shaving small bits off the stick.

Remember.....

ALWAYS have an adult present

ALWAYS store potato peelers in a safe place.

ALWAYS hold the potato peeler by the handle.

ALWAYS be seated when whittling.

ALWAYS keep an arm's length away from others when whittling.

ALWAYS look at what you're whittling.

STOP and put the potato peeler down when someone talks to you.
